# Acknowledgement

We would like to thank my professor Dr Vinotha Dinesh who gave us this opportunity to work on this project. I got to learn a lot from this project about E-commerce website for Sneaker Store. I would also like to thank our college.

At last, I would like to extend my heartfelt thanks to my parents because without their help this project would not have been successful. Finally, I would like to thank my dear friends who have been with me all the time.

# Abstract

The aim of this project is to develop an E-commerce website for Sneaker Store. In E-commerce website for Sneaker Store, user can buy trendy Sneakers from any remote location online. This program does not require any flat file. This is also highly secured program. This program has many features like searching the sneakers, different sizes in available designs, different colors and different brands of customer shops, also about upcoming sales and gifts. Each customer has to fill a small form for the first time of purchasing. This application is made by using JavaScript for making it easy.

# Introduction

E-commerce website for Sneakers Store helps user to know the about the trendy fashion under sneakers category. They can browse anytime and anywhere they wish to and they can place their order. This will help to save time of going to various stores to purchase the sneakers, it will also save your money as mainly online shopping is a bit cheaper than on- store purchase also the fuel charge will be saved. So online shopping is the efficient of shopping in this hectic life.

Our website is basically designed for the convenience of the customers. Customer will get the sneaker of different well-known brands under a single website. The website is designed in such a way that it should be user friendly to access the website from searching to delivering the product to the customer. We have given different payment gateways like cash on delivery, UPI, or via debit or credit cards like visa card or master cards.

Customer can also add the product he liked in the cart to purchase it in future. The customers will also get some of discount and free delivery for the first order. He will get festival offers and gift coupons frequently. If we don't have any product in our stock then when we'll get our stock then the customer will be notified that whether he is interested to buy sneaker.

We will add different contests every month to attract the customers. After every order we will get from our customers and every month from our regular customer will get a feedback form to know the changes our customers wants us to amend in our website. This would be the best way to improve our website and do the required updates in our website. This is the website for the user so we want them to decide what is convenient for them.

The customers will get the best sneakers in affordable rates and best deals 24\*7. This will be mainly fascinating to the youth, and helpful for the parents who want good quality of sneakers for their children. People can also gift sneakers to their loved ones. There will be 7 days return policy if the defective piece in delivered or any other reason.

# Problem Statement

Every customer's details will be saved in the database once he buys anything from our site for the future convenience. In addition, the regular viewers and our buyer will be notified about the new arrivals, upcoming sales or offers and they will also be given gift cards and best offers on their purchase. The customers have to pay very nominal delivery charges and they will get best quality and original trendy sneakers in the remote places as well.

This work will develop by .NET. .NET is one of powerful technology release by Microsoft aiming at fulfilling the idea of services. .NET is a framework which helps a developer to build window application, web application and web services using different programming languages like C#.NET, VB.NET, ASP.NET.

# Hardware and Software Requirements

## **HARDWARE REQUIREMENTS: -**

- at least 800Mhz
- 30 Mega Byte available space on hard drive

## **SOFTWARE REQUIREMENTS: -**

- Windows 10, 8, 7, Vista, XP, 64 Bit versions as well
- Screen resolution at least 800 x 600 with at least 65535 colours
- Or an Intel Mac with Parallels Desktop or VMWare Fusion

## Design Methodology

To fulfill the objectives of Online Address Book, we use HTML 5, CSS and JavaScript as a front end. The detailed software requirements are shown below. Software requirements:

1. The text editor with HTML5, CSS and JavaScript extensions.
2. An updated browser.

The figure shows the data flow diagram of E-commerce website for sneaker store:

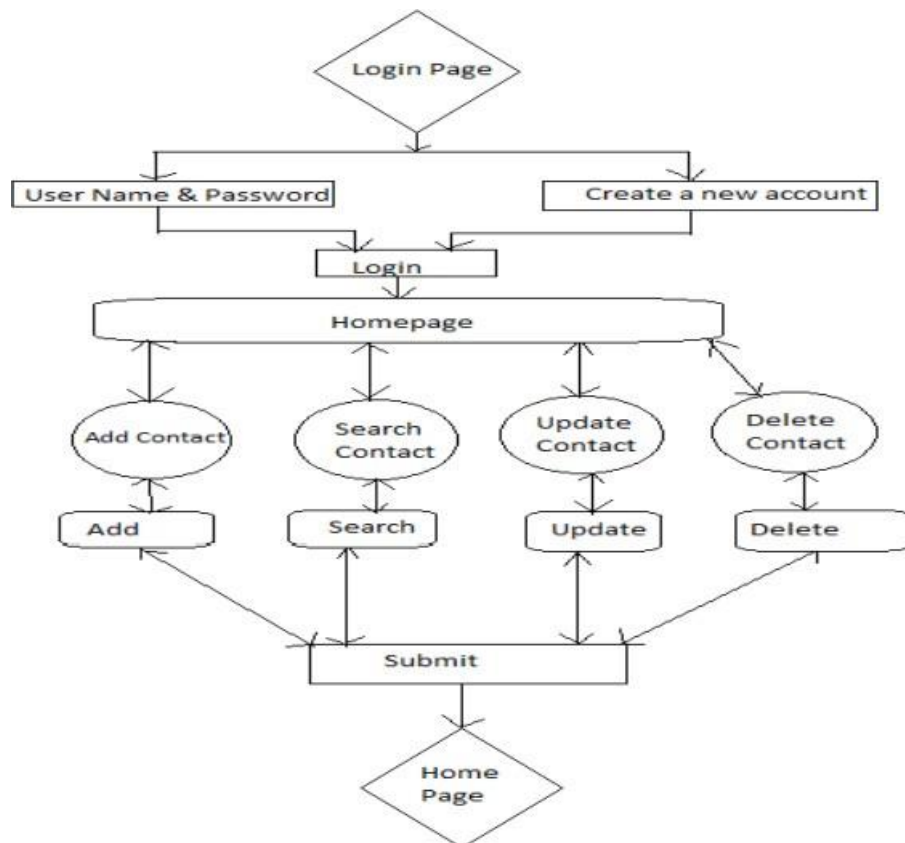

Fig No. 1

# Implementation

- **CSS**

- 1. The common css file for our website:**

```
html {  
  scroll-behavior: smooth;  
}  
  
body {  
  font-family: "Lato", sans-serif;  
  padding: 0;  
  margin: 0;  
}  
  
nav {  
  background-color: #111;  
  color: white;  
  padding: 20px 50px;  
}  
  
.navTop {  
  display: flex;  
  align-items: center;  
  justify-content: space-between;  
}  
  
.search {  
  display: flex;  
  align-items: center;  
  background-color: gray;  
  padding: 10px 20px;  
  border-radius: 10px;  
}  
  
.searchInput {  
  border: none;  
  background-color: transparent;  
}  
  
.searchInput::placeholder {  
  color: lightgray;  
}  
  
.limitedOffer {  
  font-size: 20px;  
  border-bottom: 2px solid green;  
  cursor: pointer;  
}  
  
.navBottom {
```

```

display: flex;
align-items: center;
justify-content: center;
}

.menuItem {
margin-right: 50px;
cursor: pointer;
color: lightgray;
font-weight: 400;
}

.slider {
background: url("https://images.unsplash.com/photo-1604147495798-57beb5d6af73?ixlib=rb-

# Conclusion

E-commerce website for Sneaker Store project comes with variety of features including the search category, upcoming deals, etc. Here we conclude that, user can get contacts from any remote location online by providing security, One of the most well-known and most used feature of devices to all users, developers or not, is the website for Sneaker Store. For those who use a lot the device as a phone all important and vital information they need exist in their contacts. Till today, many applications have been developed, and even more can be built that make use the device's E-commerce website for Sneaker Store is a contact management software, wherewith you can note the addresses, phone numbers, mobile, fax, company name, country, city, website address and email addresses of your contacts and partners. You can easy print list of contacts and details of selected contact, has a local database and user interface for finding and editing information about people.

# Future scope

The work done in project can be extended along several interesting directions, among these are:

1. This project can be applied in distributed databases.
2. This project can be E-commerce website for Sneaker Store.
3. This project can be applied to other programming languages.
